

Mimic Sander System

Automate sanding with a complete system

Make surface finishing fast, flexible and easy

Achieve professional surface finishing results effortlessly with Mimic Sander, an all-in-one solution designed to cater to a range of automated surface finishing needs.

We provide a complete system together with our partners

Together with our tool partner Flex Trim we also provide our recommendations on the full system, table, tool unit, and abrasive changer for you to build a complete setup that fits your production.
